Blocks

A **text block** is an elegant structure for presenting structured data. You can choose to display it using bullets or numbered lists.

Block With Bullets

- You can choose to display it using bullets.
- You can choose to display it using bullets.
- You can choose to display it using bullets.

Block With Numbered Lists

1. You can choose to display it using number list.
2. You can choose to display it using number list.
3. You can choose to display it using number list.

Content

Figures

The **images** will be automatically arranged in the most visually appealing way. Later, we will demonstrate some complex layout scenarios.

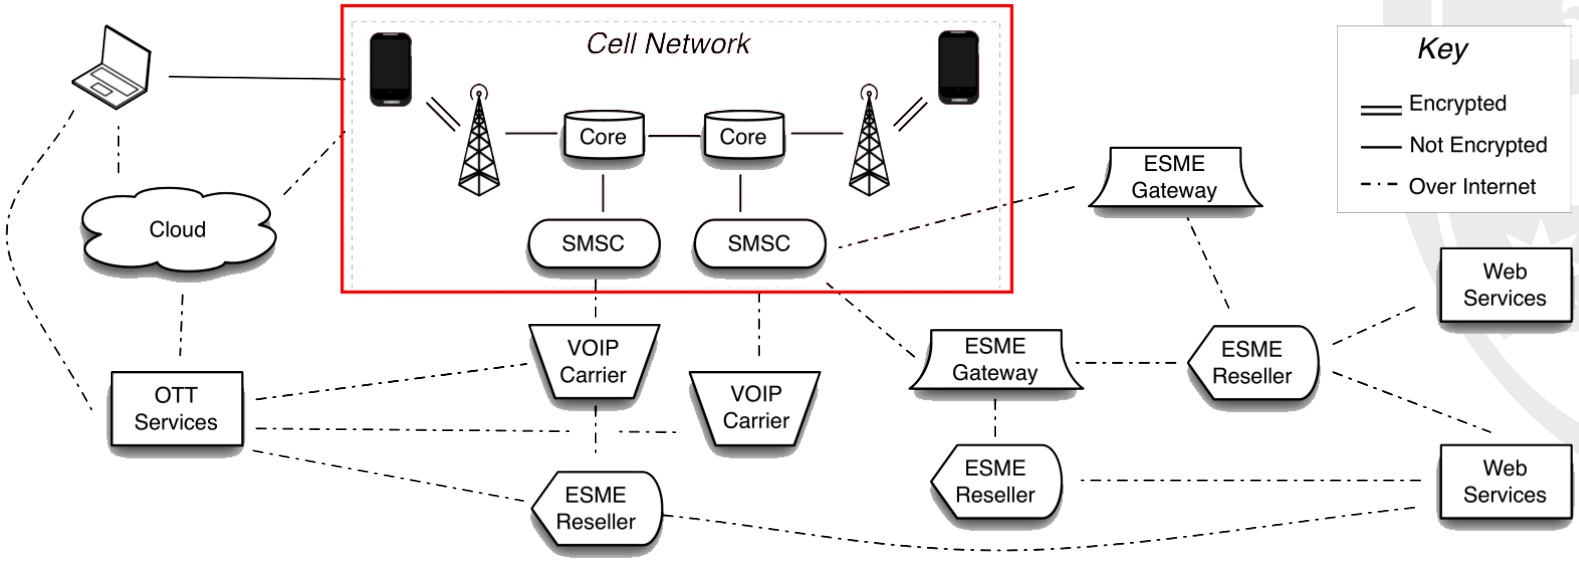

Figure 1: This is the caption for figure.

Content

Tables

There are many options for **table** layout. Please refer to the source code for details.

Formula

This slide shows how we could display **math formulas**.

Eq 1:

$$f(x) = ax^2 + bx + c$$

Eq 2:

$$\text{area} = \pi \cdot \text{radius}^2$$

Eq 3:

$$\mathcal{A} := \{x \in \mathbb{R} \mid x \text{ is natural}\}$$

Eq 4:

$$\sum_{k=0}^{n} k = 1 + \ldots + n$$

$$= \frac{n(n+1)}{2}$$

Content

Code

This is how we display the **code** in our presentation.

Adding `rbx` to `rcx` gives the desired result.

What is `fn main()` in Rust would be `int main()` in C.

```rust
fn main() {
    println!("Hello World!");
}
```

This has ``backticks`` in it (but the spaces are trimmed).
And `here` the leading space is also trimmed.

Content

Complex Layouts 1

Complex Layouts

You can easily use composer or grid func from slide to implement **complex layouts**.

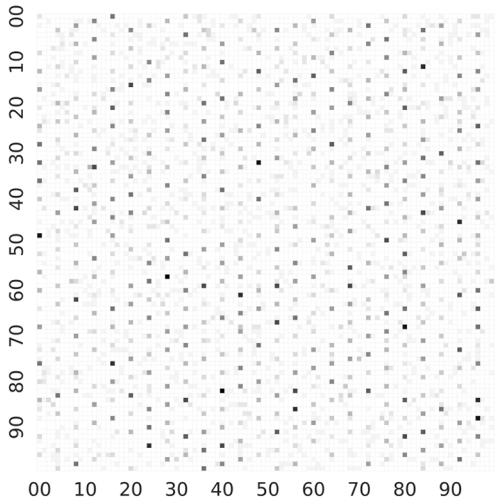

Figure 2: This is the test figure

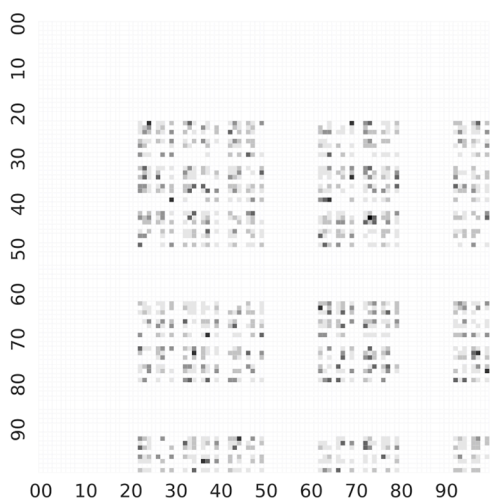

Figure 3: This is the test figure

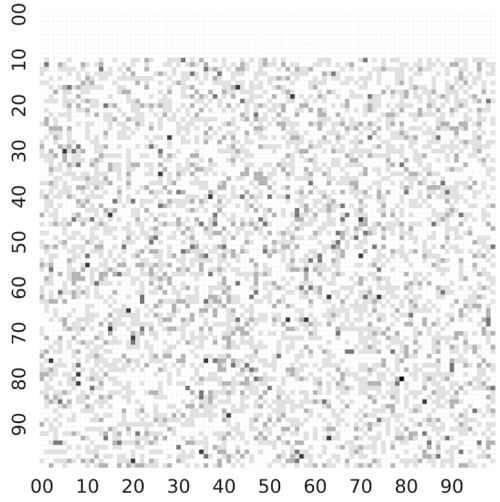

Figure 4: This is the test figure

Complex Layouts 2

As you can see, the composer function can be used to create **complex layouts**.

And adjust the different layout parameters to achieve the desired result.

Table 1: This is the table with caption

Hello	Hello	Hello
A	B	C

Table 2: This is the table with caption

	Exam 1	Exam 2	Exam 3
John	85	96	86
Mary	53	64	75
Robert	32	86	85

Thanks for Listening.

This is the **ending slide** to show some words
